ABOUT ME

Computer Science Engineering student with strong skills in Java, web development, and Generative AI (GenAI), with a keen interest in research. Experienced in building real-world applications including full-stack systems and AI-powered solutions using LLMs. Passionate about problem-solving and developing scalable intelligent applications.

EDUCATION

BE CSE Nandha Engineering College CGPA: 8.5	2023 – 2027	GHSS , KARATTADIPALAYAM 12th Grade Percentage: 85.33	2021 – 2022
		GHSS , KARATTADIPALAYAM 10th Grade Percentage: 84.8	2019 – 2020

SKILL

Programming: Java, Python

Web Technologies: HTML, CSS, React, Node.js, Express.js

Database: MySQL, MongoDB

GenAI: LLMs, RAG (Retrieval-Augmented Generation), Prompt Engineering

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Tableau, Power BI, Figma

Core Concepts: Data Structures, OOP, Problem Solving

PROJECTS & INTERNSHIP

RAG-Based Multimodal Question Answering System for Multiple PDF Documents

Built a full-stack GenAI application to query PDFs using a RAG pipeline with ChromaDB. Extracted text and images for multi-modal retrieval and generated answers using LLaMA3 (Ollama). Developed with FastAPI and React.js.

Wedding Hall Booking System (MERN Stack)

Built a MERN stack web app with JWT authentication, role-based access (user/admin), hall availability management, gallery & facilities control, and Stripe payment integration.

Nandha Project Showcasing Website

Built a full-stack Project Showcasing Website using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL. Implemented role-based access for Admins and Visitors to manage and view categorized campus-wise projects

Intern – Shellcode (15 Days)

Hands-on experience in LangChain, RAG, AI agents, prompt engineering, Hugging Face models, embeddings, and vector databases.

Intern – Admire Solution (30 days)

Built an AI-powered quiz system using RAG and LLMs to retrieve questions from PDFs, generate multiple-choice options, and provide instant feedback with correct answers and explanations.

ACHIEVEMENTS & PARTICIPATIONS

- **Uyir Road Safety Hackathon 2025 – Finalist** – Developed and presented a web application that serves as an interface between the public and municipal authorities to report road hazards, potholes, faulty streetlights, and drainage issues in real time, as part of a government-conducted program.
- **Workshop by Indian Medical Council** – Attended a workshop on Artificial Intelligence in Healthcare, gaining insights into its applications in the medical field
- **Hackathon Project** – Developed an interactive dashboard using Tableau to visualize and analyze data effectively, enabling better decision-making.
- **Portable Water Purifier** – Developed a compact purifier with a four-layer filtration system; showcased in Smart India Hackathon (SIH) and MSME programs.
